- Connect MetaMask

4 IMPORT THE TOKEN

0x53a03E9EdF4Fa647268F19cF2eC509A7A1C52359

- Paste in Uniswap

5 SWAP ETH FOR WOLF

- Enter amount
- Confirm Swap

6 ADD WOLF TO WALLET

- Import tokens in MetaMask

Wolfenstein

✔ Step 1: Set Up a Crypto Wallet

Download MetaMask (browser extension or mobile app).

Create a wallet:

Click Create Wallet.

Save your seed phrase securely (offline, never share it).

Set a strong password.

✔ Step 2: Add Funds (ETH)

You need Ethereum (ETH) to buy tokens and pay gas fees.

Buy ETH through:

MetaMask's built-in buy option (using debit/credit or bank transfer).

Or use an exchange like Coinbase, Binance, or Kraken, then transfer ETH to your

MetaMask wallet address.

✔ Step 3: Connect to Uniswap

Go to Uniswap.

Click Connect Wallet and choose MetaMask.

Make sure your network is Ethereum Mainnet.

✔ Step 4: Import the Token

Copy the contract address:

0x53a03E9EdF4Fa647268F19cF2eC509A7A1C52359

Paste it into Uniswap's token search bar.

Click Import (verify it matches DexScreener info).

✔ Step 5: Swap ETH for WOLF

Select ETH → WOLF.

Enter the amount of ETH you want to spend.

Click Swap, confirm in MetaMask, and wait for the transaction to complete.

✔ Step 6: Add WOLF to Wallet

In MetaMask, click Import Tokens.

Paste the same contract address.

Now you'll see your WOLF balance.

⚠ Safety Tips

Double-check the contract address.

Start with a small amount to test.

Never share your seed phrase.

Be cautious of high slippage or suspicious liquidity.
