

Luna Bloom Psychiatry

About Luna Bloom Psychiatry

It is a center where healing starts with compassion, connection, and care. The integrative approach gives importance to emotional wellness with respect to the life journeys of our clients and their own timing. Through psychiatric evaluation, medication management, and collaborative care (including appropriate referrals and coordination with other providers), we bring our clients back into new balance and resilience. Whether the treatment is in person or through telepsychiatry, attentive and individualized care is provided by highly qualified providers, including board-certified psychiatrists with multiple subspecialties (child and forensic psychiatry; neuropsychiatry; and integrative psychopharmacology). Luna Bloom Psychiatry is a private, concierge practice, not the typical cookie-cutter platform where you have to handle scheduling, pharmacy needs, or insurance claims on your own. Built on the core values of empathy, collaboration, and customization, we help you find that internal strength that enables you to flourish.

Our Story

Beautiful, affordable, and accessible. Luna Bloom began with a vision: to create a space where mental health care feels as gentle and natural as growth itself. As a psychiatric nurse practitioner and a woman deeply connected to the emotional complexities of life, I often found myself wishing for a practice that didn't feel clinical or cold — but instead, nurturing, intentional, and warm. I wanted to offer care that held space for healing in all its forms: messy, non-linear, and still, deeply beautiful. The name Luna Bloom came to me while reflecting on two of the most powerful symbols of transformation:

The moon, which reminds us that healing comes in phases— and that even in darkness, we are still whole.

A blooming flower, which speaks to the quiet strength it takes to unfold, root, and rise toward the light.

Luna Bloom Psychiatry was founded to be the light — a place where clients can feel seen, supported, and empowered. We serve women, men, mothers, families and all ages across the lifespan who are navigating anxiety, depression, life transitions, and more, with care that's both clinically sound and soulfully centered. This isn't just psychiatry— it's a place to begin again. A place to bloom.
