Shop top class 24k Golden Arowana fish on the market at [Arowanaz.org](http://Arowanaz.org)—your trusted resource for ethically bred, CITES-licensed specimens.

### The Arowana: A Living Fossil with Timeless Appeal

Arowanas (Osteoglossiformes) are incessantly also known as “residing fossils” with the aid of their prehistoric lineage dating back over 140 million years. These iconic fish resemble miniature dragons, with elongated our bodies, barbels, and iridescent scales that flicker like invaluable metals. Among the rarest and maximum coveted sorts is the 24k Golden Arowana—a subspecies of the Asian Arowana (*Scleropages formosus*) prized for its extraordinary gold hue.

### Taxonomy & Evolutionary History

The 24k Golden Arowana belongs to the Asian Arowana (*Scleropages formosus*), a species labeled below:

Kingdom: Animalia

Phylum: Chordata

Class: Actinopterygii (Ray-finned Fish)

Order: Osteoglossiformes (Bony-Tongued Fish)

Family: Osteoglossidae

Genus: *Scleropages*

Species: *formosus*

Asian Arowanas diverged from different osteoglossids all over the Cretaceous interval, conserving primitive developments like a bony tongue and air-respiratory talent. Their shut loved ones incorporate the Silver Arowana (*Osteoglossum bicirrhosum*) and Jardini Arowana (*Scleropages jardinii*), however the 24k Golden stands proud for its genetic predisposition to intense gold pigmentation.

### Physical Characteristics: Why the 24k Golden Stands Out

The 24k Golden Arowana earns its call from its metal gold scales that mirror easy like pure gold. Key trends comprise:

**Size:** Reaches 24–36 inches in captivity (wild specimens grow larger).

**Color:** Uniform gold with diffused iridescence; rare “top notch grade” versions reveal deeper, more brilliant tones.

**Barbels:** Two whisker-like appendages close the mouth used for sensing prey.

**Sexual Dimorphism:** Males increase longer dorsal fins and broader heads for the period of breeding season.

Unlike albino or platinum morphs, the 24k Golden's gold pigment is genetically steady, making it a prized collector's merchandise.

## Habitat & Natural Distribution

Wild 24k Golden Arowanas inhabit tropical river structures in Southeast Asia, inclusive of the Mekong, Sumatra, and Borneo. They thrive in:

**Water Temperature:** 28–30°C (eighty two–86°F)

**pH:** 6.5–7.5 (rather acidic to impartial)

**Dissolved Oxygen:** High tiers (through flowing waters)

**Substrate:** Soft sand or mud with submerged vegetation.

In captivity, replicating these stipulations is valuable, see our Arowana Tank Setup Guide for particulars.

## Aquarium Care: Keeping Your 24k Golden Thriving

### Tank Requirements

**Minimum Size:** 500+ gallons (for adults); juveniles want 2 hundred+ gallons.

**Filtration:** Canister filters + sump methods to care for pristine water.

**Water Flow:** Strong currents mimicking river rapids.

**Decor:** Driftwood, rocks, and floating plant life (steer clear of sharp edges).

### Water Chemistry

#### Parameter Ideal Range

**Temperature** 28–30°C (eighty two–86°F)

**pH** 6.5–7.5

**Ammonia/Nitrites** zero ppm

**Nitrates** <20 ppm

### Feeding

Feed a combination of dwell/frozen meals (shrimp, crickets, silverfish) and superb pellets. Juveniles require day-to-day feedings; adults consume 2–three times weekly. Avoid overfeeding to hinder weight problems.

### Tankmates

Compatible with big, peaceable fish like:

Other Arowanas (same length)

Catfish (e.g., Plecostomus)

Large Barbs (e.g., Tinfoil Barb)

Avoid small fish—they'll be eaten!

### Breeding & Reproductive Challenges

24k Golden Arowanas are mouthbrooders: Females lay eggs in nests, then convey them in their mouths for fifty–60 days except hatching. Captive breeding is tough as a consequence of:

Gender Identification: Hard to tell apart adult males/women folk till maturity.

Space Needs: Pairs require 1,000+ gallon tanks.

Low Success Rates: Only 10–15% of spawns set off viable fry.

For developed breeders, Arowanaz.org's Master Breeding Guide delivers skilled pointers.

 Legal & Conservation: Protecting a Precious Resource

The Asian Arowana (including 24k Golden) is listed under CITES Appendix I, that means overseas business is closely limited. To legally own one:

Obtain a CITES let out of your native natural world enterprise.
